4. MULTI-SPECTRAL REMOTE SENSING & GROUND TELEMETRY EVIDENCE

Sentinel-2 MSI Level-2A imagery captured on 04-Oct-2026 indicates severe spectral reflectance attenuation across Near-Infrared B8 over 1.8 Ha of parcel FLD-01. Automated agro-met station recorded extreme anomalous precipitation. In-situ capacitive soil moisture probes at 15cm and 45cm depths recorded continuous anaerobic saturation (>75% volumetric water content) leading to localized root hypoxia and severe lodging.

5. STATUTORY DECLARATION & LOSS ASSESSMENT SIGN-OFF

I hereby solemnly declare that the parcel parameters and disaster details submitted herein are true to the best of my knowledge. The damage occurred directly due to the localized peril noted above. I have not received duplicate relief for this parcel under SDRF/NDRF, and I authorize official joint survey verification under PMFBY operational guidelines.
